6. A vacuum cleaner in the form of a Robert is used .... to avoid furniture.
   a. AI b. VR c. AR d. IOT
7. Networks .... connect devices to each other without wires.
   a. wired b. port c. wireless d. cables

12 Damietta Governorate | The Educational Computer Supervision

1 Put (✓) in front of the correct sentence and (×) in front of the wrong one :

1. Copy, paste and cut from digital editing tools. ( )
2. Android is a closed source mobile operating system. ( )
3. You can share your name, E-mail and phone number online. ( )
4. Wireless networks connect without wiring (wireless or Wi-Fi). ( )
5. It is preferable that the password consist of numbers only. ( )
6. OneDrive allows you to store, share, and access files from any device. ( )
7. In HTML language you can't add some elements such as headings, links, and images to web page. ( )

2 Choose the correct answer from a, b, c or d :

1. .... it combines the real world with a virtual world by adding images using computers.
   a. Virtual reality   b. Augmented reality
   c. Artificial intelligence   d. ISP
2. The operating system used on Apple mobile devices is ....
   a. Windows   b. Android   c. iOS   d. Modem
3. .... is a device that connects a local area network (LAN) to the internet.
   a. Modem   b. Laptop   c. Router   d. AI
4. The .... is an example of a general database credible and accurate.
   a. EKB   b. smart phone   c. social media   d. network
5. Tag .... used to add paragraphs on a web page.
   a. <a>   b. <h1></h1>   c. <P></P>   d. none of them
6. .... is the protection of systems, networks, devices, and data from electronic attacks.
   a. Database   b. Cybersecurity   c. Search engine   d. Windows
7. The impact on your sleep cycle is one of .... of electronic games.
   a. Security dangers   b. Psychological dangers
   c. Physical dangers   d. All of them
8. Data .... converts data into a code to prevent unauthorized user access.
   a. encryption   b. transfer   c. breach   d. copy

13 Port Said Governorate | Port Fouad Educational Administration

1 Choose the correct answer from a, b, c or d :

1. .... is a 3D virtual environment that allows users to explore and interact with their surroundings as if it were reality.
   a. Augmented Reality   b. Virtual Reality
   c. Future Technology   d. AI
2. It helps people search websites based on keywords and key data ....
   a. Search engines   b. database   c. library indexes   d. Excel

3. Programmers use hypertext markup language ....
   a. Mthl b. Tmlh c. HTML d. ROS
4. Electronic games shared by friends on the internet help promote ....
   a. Creative and critical thinking b. skills
   c. security risks d. none of them
5. Copyright includes ....
   a. visual b. audio c. written d. all of them
6. .... these online applications provide guidance and financial services.
   a. Rights b. Rabo-advisors c. Brakes d. Shares
7. The PowerPoint program helps to create ....
   a. presentations b. system c. platform d. password

2 Put (✓) in front of the correct sentence and (×) in front of the wrong one :

1. The OneDrive platform allows you to store share and access your files from any device. ( )
2. Cybersecurity is the protection of systems, networks, devices, and data from cyberattacks. ( )
3. Passwords that consist of at least eight letters, numbers, and random symbols are the most secure. ( )
4. Most computers run Android. ( )
5. To connect devices without wires or cables, we use the wired network. ( )
6. Program full encryption works to protect your information so that only you can access it. ( )
7. Most computers work with the operating system iOS. ( )
8. AR is a comprehensive term for computer applications that perform complex tasks. ( )

14 Beni Suef Governorate El Wasta Educational Administration

1 Put (✓) in front of the correct sentence and (×) in front of the wrong one :

1. Networks are groups of devices or things that are connected to each other for a common purpose. ( )
2. Wired networks connect without wiring. ( )
3. Mobile devices include smartphones, tablets, and e-readers. ( )
4. Android is an operating systems for Mobile devices. ( )
5. Microsoft Windows is the operating system for most computers. ( )
6. Do not share personal information online. ( )
7. Do not communicate with people you don't know or who make you feel uncomfortable. ( )

2 **Choose the correct answer from a, b, c or d :**

1. .... combines the real world with a virtual world by adding images.
   a. Augmented reality b. Artificial intelligence
   c. Virtual reality d. ROS
2. .... is the ability of the computer to think, learn and deduce.
   a. Artificial intelligence b. Augmented reality
   c. Virtual reality d. IOS
3. .... can take you to a world where insects and atoms are bigger than you, so that you can study them closely.
   a. Augmented reality b. Artificial intelligence
   c. Virtual reality d. all of them
4. .... help people to search internet websites.
   a. Artificial intelligence b. Search engines
   c. Databases d. Word
5. .... are a collection of information which are typically stored in a computer system.
   a. Internet b. Search engines c. Databases d. Software
6. Mobile devices are handheld computers and can access ....
   a. the internet b. printer c. flash memory d. ROS
7. .... this type of authentication will scan your finger, as a way of confirming it's you.
   a. Fingerprint authentication b. Facial recognition
   c. Passwords d. Camera
8. .... are played over the internet with friends.
   a. Electronic games b. Virtual reality
   c. Artificial intelligence d. Augmented reality

15 Assiut Governorate | Assiut Educational Administration

1 **Put (✓) in front of the correct sentence and (×) in front of the wrong one :**

1. Computer networks connect computers together to share important information and data. ( )
2. All electronic games that friends play over the Internet is no harm in them. ( )
3. There is no difference between augmented reality and virtual reality. ( )
4. There are several drawbacks to electronic games such as security risks. ( )
5. For online safety precautions: Change your password every 3 months. ( )

7. When searching in any database, it is preferable to use keywords. ( )

2 Choose the correct answer from a, b, c or d :

1. Multi-factor authentication requires at least .... method.
   a. three b. two c. one d. five
2. Allow only .... to see your social media pages.
   a. friends and family b. unknown people c. bullies d. robot
3. .... is used to help you write down your school work.
   a. Word b. Excel c. PowerPoint d. Data
4. .... works on mimicking voices by providing it with a natural human tone.
   a. Programming b. Artificial Intelligence
   c. Networks d. Databases
5. Real life activities should not be replaced with electronic games, such as ....
   a. good sleep b. bullies c. strangers d. all of them
6. .... combines the real world and virtual reality by adding computer generated images.
   a. Augmented reality b. Virtual reality
   c. Artificial intelligence d. None of them
7. Wired networks use wires and cables that are connected to openings in devices called ....
   a. switch b. server c. ports d. cables
8. .... is an example of public database that covers various topics.
   a. Google b. Facebook
   c. Egyptian Knowledge Back d. Word

16 Minia Governorate Maghagha Educational Directorate

1 Put (✓) in front of the correct sentence and (×) in front of the wrong one :

1. Wireless networks connect without wiring. ( )
2. User experience doesn't describe how to use the product and interact with. ( )
3. Virtual reality (VR) is a virtual 3-D environment. ( )
4. HTML is commonly chosen to create web pages. ( )
5. We use power-point to create a presentation. ( )
6. Subheadings font size is smaller than the heading. ( )
7. MFA requires at least two ways of identifying yourself. ( )
8. <body>.......</body> tag is used to change the font size. ( )

2 Choose the correct answer from a, b, c or d :

1. .... converts data into a code to prevent unauthorized user access.
   a. Data Transfer b. Copy
   c. Send d. Data encryption

2. From the software that provide cloud computing .... applications.
   a. Microsoft Word
   b. Microsoft 365
   c. Google workspace
   d. both (b) & (c)
3. The most famous mobile operating systems are ....
   a. Linux
   b. Android
   c. Windows
   d. none of them
4. .... converts the signal from internet service provider (ISP) to digital signal.
   a. Computer
   b. Modem
   c. Keyboard
   d. Motherboard
5. From the ways of .... pins, passwords and personal questions.
   a. OSS
   b. MFA
   c. GPR
   d. ISP
6. .... helps people of determination.
   a. Printer
   b. Assistive technology
   c. Keyboard
   d. Scareware
7. .... group of people or things that are connected to each other for common purpose.
   a. Explorer
   b. Network
   c. Computer
   d. Malware

17 Qena Governorate | Qena Educational Administration

1 Put (✓) in front of the correct sentence and (×) in front of the wrong one :

1. Government doesn't support people of determination. ( )
2. Search results will be credible and accurate on social media. ( )
3. The most important software is the operating system. ( )
4. Programmers use HTML to create web pages. ( )
5. Ali and Osama are good friends, they can exchange passwords and accounts. ( )
6. Authentication with scan your finger to confirming it's your password. ( )
7. To protect your device away of risks, install anti-virus. ( )

2 Choose the correct answer from a, b, c or d :

1. Computer connect to internet using radio waves via ....
   a. Ethernet cable
   b. Wi-Fi
   c. CPU
   d. AI
2. The latest and most advanced version of a service or a product ....
   a. VR
   b. Cutting-edge technology
   c. AI
   d. AR
3. .... is the operating system loaded with apple computers only.
   a. MAC o.s
   b. Android
   c. Windows
   d. GPS
4. .... is an open-source software use for building robots.
   a. Presentation
   b. ROS
   c. Word processing
   d. IOS

5. .... is a software responsible for web pages browsing.
   a. Operating systems b. Browser c. Excel d. Word
6. A tag used for controlling font size and color ....
   a. <head>...</head> b. <i>...</i> c. ... d. none of them
7. Electronic games can affect the sleep cycle, that means .... danger.
   a. security b. physical c. psychological d. all of them
8. MFA requires at least .... ways of identifying yourself.
   a. one b. two c. three d. five

18 Sohag Governorate Maragha Educational Administration

1 Put (✓) in front of the correct sentence and (×) in front of the wrong one :

1. Artificial intelligence is the ability of a computer to think and learn. ( )
2. User experience is linked to the development of products and services. ( )
3. Virtual reality is used to unlock mobile phones. ( )
4. Electronic games do not encourage teamwork. ( )
5. Facial recognition and passwords as a way to protect digital devices. ( )
6. Eye strain is one of the psychological dangers of electronic games. ( )
7. Advice bots are online applications that provide guidance and financial services. ( )

1. .... is used when copying, pasting, or cutting information.
   a. Digital editing tools b. QR codes
   c. Hyperlink d. Painter's tools
2. A/An .... is the software that manages computer's functions.
   a. Operating system b. Windows Explorer
   c. E-readers d. Google Chrome
3. .... is used to send data to a specific device over a network to help speed up data transfer.
   a. QR code b. Switches c. Modem d. Mobile
4. To protect your computer from cyber security threats ....
   a. use anti-virus
   b. confirm your security settings are up to date
   c. change the passwords every certain period
   d. all of them
5. Copyright includes written, ... material.
   a. visual b. audio c. video d. all of them
6. .... refers to work that has been granted permission to share by the creator.
   a. Creative commons b. Copyright
   c. Hacking d. All of them
7. .... the latest and most advanced version of a service or product
   a. Augmented reality b. Cutting edge technology
   c. Artificial intelligence d. Assistive technology

Sample Test 3

1 Choose the correct answer from a, b, c or d.

1. .... is a set of information that is usually stored in a computer system and can be easily accessed.
   a. Switches b. Augmented reality
   c. Databases d. Modem
2. .... are applications that perform complex tasks that simulate the thinking and performance of the human element, such as the ability to learn and deduce.
   a. IPS Internet service b. Ports
   c. Artificial intelligence d. Word processor program
3. Through .... ,you can learn about some of the product's features.
   a. accounting tables b. email
   c. digital fingerprint d. user experience
4. .... is a simulated 3-D environment that allows users to explore and interact with the surroundings, as if it were reality.
   a. CPU b. LAN c. VR d. GPR
5. Egypt considers work in the public domain if the creator has been deceased for at least ...., no creator permission is required.
   a. 30 years b. 50 years c. 40 years d. 60 years
6. .... is on-demand storing and accessing data and programs via remote servers on the internet.
   a. Cloud computing b. Phishing
   c. Remote servers d. Downloading
7. A/An .... is the software that manages a computer's functions, such as memory, drives, printers, and other devices.
   a. Operating system b. Windows Explorer
   c. E-readers d. Google Chrome

2 Put [✓] in front of the correct sentence and [✗] in front of the wrong one.

1. Google and OneDrive TM are not cloud computing services. [ ]
2. Facial recognition will scan your face using your device's camera. [ ]
3. Switches can send data to a specific device over a network. [ ]
4. Work in data libraries such as the Egyptian Knowledge Bank (EKB) is not approved for use. [ ]
5. The Alexandria Library's index can be used through the Digital Library's website on the Internet. [ ]
6. In HTML, it is difficult to add elements such as text, links, images, audio, and video clips to a web page. [ ]
7. The tag bold text is used to write a bold font. [ ]
8. The <p> </p> tag is used to write a large font. [ ]

Sample Test 4

1 Choose the correct answer from a, b, c or d.

1. The function of <a> ... is ....
   a. create hyperlink
   b. change text to underline
   c. change text to bold
   d. change text to italic
2. .... commands are given to the computer in the form of code that can be used to create animation.
   a. Email
   b. Assistive technology
   c. Programming languages
   d. Hyperlink tools
3. Through .... you can transfer data via wires and cables.
   a. Email
   b. wireless network
   c. Wi-fi
   d. wired network
4. .... example of a public and reliable database.
   a. Egyptian Knowledge Bank (EKB)
   b. Social networking sites
   c. Digital research tools
   d. Mobile
5. Screen magnification software, hearing aids, and programs that turn speech to text and text to speech are examples of ....
   a. keyboard
   b. GPR
   c. assistive technology
   d. all of them

   a. credible b. accurate c. unbiased d. all of them
7. ....is the standard programming language used to create web pages.
   a. Android b. MacOS c. Chrome OS d. HTML
8. MFA requires at least .... ways of identifying yourself usually.
   a. two b. three c. four d. five

2 Put (✓) in front of the correct sentence and (✗) in front of the wrong one.

1. The opening tag is used to create the textual content of the web page. (   )
2. The Content is to create the textual content of the web page. (   )
3. Artificial intelligence (AI) is the ability of a machine such, as a computer, to think and learn. (   )
4. It's moral to post others' ideas as your own. (   )
5. Facial Recognition will scan your face using your device's camera. Only your face will allow your device or device's apps to open. (   )
6. The HTML tag <h6>......</h6> refers to heading. (   )
7. A library catalogs is a database which includes all the items owned by a library. (   )

Sample Test 5

1 Put [✓] in front of the correct sentence and [✗] in front of the wrong one.

1. Artificial intelligence (AI) is the computer's ability to think, learn, and deduce. [ ]
2. Use PowerPoint application to do a sweep of your computer and remove any viruses. [ ]
3. Operating system is used for managing computer's functions. [ ]
4. The iOS operating system in Apple phones is a closed source operating system. [ ]
5. Work in data libraries such as the Egyptian Knowledge Bank (EKB) is not approved for use. [ ]
6. Remember to ask a trusted adult's permission before you download. [ ]
7. One of the safety precautions when dealing with the Internet is do not share personal information online. [ ]
8. Microsoft 365™ is one of the most popular software that deals with cloud computing applications. [ ]

2 Choose the correct answer from a, b, c or d.

1. .... refers to work that has been granted permission to share by the creator.
   a. Creative Commons b. Copyright
   c. Hacking d. all of them
2. .... helps in searching for data on websites.
   a. Operating systems b. Search engines
   c. Programming languages d. Paint program.
3. .... is used to create web pages and consists of several basic elements such as titles, paragraphs, and links.
   a. Assistive technology b. Databases
   c. Advanced technology d. Hypertext Markup Language (html)
4. .... converts the signal from the Internet service provider (ISP) into a digital signal.
   a. Port b. Modem c. Router d. Switch
5. When taking information from the Internet, be sure that you are using ....
   a. unreliable source b. reliable source
   c. untrusted source d. none of them
6. .... networks connect without wiring.
   a. Historical b. Imitate c. Wireless d. Complex
7. One of the safety precautions when dealing with the Internet is Use strong passwords and change them every ....
   a. three months b. five months c. one year d. two weeks

Sample Test 2

1 Put [✓] in front of the correct sentence and [X] in front of the wrong one.

1. The small screen size of portable devices is one of the problems that makes reading text and viewing graphs easy. [X]
2. The <i> </i> tag is used to write emphasize text. [X]
3. Malware is the greatest cyber security threat. [✓]
4. The Android system is considered a closed source mobile operating system. [X]
5. The ROS operating system is one of the advanced operating systems for operating robots. [✓]
6. The <h1> </h1 tag is used to write a large title. [✓]
7. Using weak passwords and making it fixed is one of the safety precautions when dealing with the internet. [X]
8. Spoofing is a cyber-criminal pretending to be a business, or known person, to trick you to provide your information. [✓]

2 Choose the correct answer from a, b, c or d.

1. .... is used when copying, pasting, or cutting information.
   a. Digital editing tools b. QR codes
   c. Hyperlink d. Painter's tools
2. A/An .... is the software that manages computer's functions.
   a. Operating system b. Windows Explorer
   c. E-readers d. Google Chrome
3. .... is used to send data to a specific device over a network to help speed up data transfer.
   a. QR code b. Switches c. Modem d. Mobile
4. To protect your computer from cyber security threats ....
   a. use anti-virus
   b. confirm your security settings are up to date
   c. change the passwords every certain period
   d. all of them
5. Copyright includes written, ... material.
   a. visual b. audio c. video d. all of them
6. .... refers to work that has been granted permission to share by the creator.
   a. Creative commons b. Copyright
   c. Hacking d. All of them
7. .... the latest and most advanced version of a service or product
   a. Augmented reality b. Cutting edge technology
   c. Artificial intelligence d. Assistive technology

Sample Test 3

1 Choose the correct answer from a, b, c or d.

1. .... is a set of information that is usually stored in a computer system and can be easily accessed.
   a. Switches — b. Augmented reality
   c. Databases — d. Modem
2. .... are applications that perform complex tasks that simulate the thinking and performance of the human element, such as the ability to learn and deduce.
   a. IPS Internet service — b. Ports
   c. Artificial intelligence — d. Word processor program
3. Through ...., you can learn about some of the product's features.
   a. accounting tables — b. email
   c. digital fingerprint — d. user experience
4. ....is a simulated 3-D environment that allows users to explore and interact with the surroundings, as if it were reality.
   a. CPU — b. LAN — c. VR — d. GPR
5. Egypt considers work in the public domain if the creator has been deceased for at least ...., no creator permission is required.
   a. 30 years — b. 50 years — c. 40 years — d. 60 years
6. .... is on-demand storing and accessing data and programs via remote servers on the internet.
   a. Cloud computing — b. Phishing
   c. Remote servers — d. Downloading
7. A/An .... is the software that manages a computer's functions, such as memory, drives, printers, and other devices.
   a. Operating system — b. Windows Explorer
   c. E-readers — d. Google Chrome

2 Put [✓] in front of the correct sentence and [✗] in front of the wrong one.

1. Google and OneDrive TM are not cloud computing services. [x]
2. Facial recognition will scan your face using your device's camera. [✓]
3. Switches can send data to a specific device over a network. [✓]
4. Work in data libraries such as the Egyptian Knowledge Bank (EKB) is not approved for use. [x]
5. The Alexandria Library's index can be used through the Digital Library's website on the Internet. [✓]
6. In HTML, it is difficult to add elements such as text, links, images, audio, and video clips to a web page. [x]
7. The tag bold text is used to write a bold font. [✓]
8. The <p> </p> tag is used to write a large font. [x]

Sample Test 5

1 Put [✓] in front of the correct sentence and [X] in front of the wrong one.

1. Artificial intelligence (AI) is the computer's ability to think, learn, and deduce. [✓]
2. Use PowerPoint application to do a sweep of your computer and remove any viruses. [x]
3. Operating system is used for managing computer's functions. [✓]
4. The iOS operating system in Apple phones is a closed source operating system. [✓]
5. Work in data libraries such as the Egyptian Knowledge Bank (EKB) is not approved for use. [X]
6. Remember to ask a trusted adult's permission before you download. [✓]
7. One of the safety precautions when dealing with the Internet is do not share personal information online. [✓]
8. Microsoft 365™ is one of the most popular software that deals with cloud computing applications. [✓]

2 Choose the correct answer from a, b, c or d.

1. .... refers to work that has been granted permission to share by the creator.
   a. Creative Commons b. Copyright
   c. Hacking d. all of them
2. .... helps in searching for data on websites.
   a. Operating systems b. Search engines
   c. Programming languages d. Paint program.
3. .... is used to create web pages and consists of several basic elements such as titles, paragraphs, and links.
   a. Assistive technology b. Databases
   c. Advanced technology d. Hypertext Markup Language (html)
4. .... converts the signal from the Internet service provider (ISP) into a digital signal.
   a. Port b. Modem c. Router d. Switch
5. When taking information from the Internet, be sure that you are using............
   a. unreliable source b. reliable source
   c. untrusted source d. none of them
6. .... networks connect without wiring.
   a. Historical b. Imitate c. Wireless d. Complex
7. One of the safety precautions when dealing with the Internet is Use strong passwords and change them every........................ .
   a. three months b. five months c. one year d. two weeks

Sample Test 4

1 Choose the correct answer from a, b, c or d.

1. The function of <a> ... is ....
   a. create hyperlink b. change text to underline
   c. change text to bold d. change text to italic
2. .... commands are given to the computer in the form of code that can be used to create animation.
   a. Email b. Assistive technology
   c. Programming languages d. Hyperlink tools
3. Through .... you can transfer data via wires and cables.
   a. Email b. wireless network
   c. Wi-fi d. wired network
4. .... example of a public and reliable database.
   a. Egyptian Knowledge Bank (EKB) b. Social networking sites
   c. Digital research tools d. Mobile
5. Screen magnification software, hearing aids, and programs that turn speech to text and text to speech are examples of ....
   a. keyboard b. GPR
   c. assistive technology d. all of them
6. When doing research via internet, use your evaluation skills to ensure the content you select is ....
   a. credible b. accurate c. unbiased d. all of them
7. ....is the standard programming language used to create web pages.
   a. Android b. MacOS c. Chrome OS d. HTML
8. MFA requires at least .... ways of identifying yourself usually.
   a. two b. three c. four d. five

2 Put (✓) in front of the correct sentence and (✗) in front of the wrong one.

1. The opening tag is used to create the textual content of the web page. (x)
2. The Content is to create the textual content of the web page. (x)
3. Artificial intelligence (AI) is the ability of a machine such, as a computer, to think and learn. (✓)
4. It's moral to post others' ideas as your own. (x)
5. Facial Recognition will scan your face using your device's camera. Only your face will allow your device or device's apps to open. (✓)
6. The HTML tag <h6>......</h6> refers to heading. (x)
7. A library catalogs is a database which includes all the items owned by a library. (✓)

Sample Test 1

1 Put [✓] in front of the correct sentence and [✗] in front of the wrong one.

1. Wireless networks use physical wiring and cables which are plugged into holes on devices. [x]
2. Using windows helps students become active participants in learning and makes learning more memorable. [✓]
3. Switches help to make connections easier and faster. [✓]
4. Meeting needs describes how people use and interact with a product, and how they evaluate their experiences. [✓]
5. Wi-Fi technology connects network devices to each other wirelessly. [✓]
6. Cutting-edge technology is defined as the latest and most advanced version of services or products. [✓]
7. The Closing tag is used to write the title of a web page. [x]
8. The <font size="1"> tag is used to write a paragraph. [x]

2 Choose the correct answer from a, b, c or d.

1. .... connects a LAN to the Internet.
   a. Modem b. Transformers c. QR codes d. Databases
2. .... connects the devices of the network to each other wirelessly.
   a. Modem b. Search engines c. Wi-Fi d. Switches
3. You can search for some books in the school library by ....
   a. databases b. email
   c. printers d. user experience
4. Artificial intelligence (AI), augmented reality (AR), and virtual reality (VR) are examples of ....
   a. Footprint b. Cutting edge technology
   c. Piracy d. Privacy
5. .... from the devices that can be connected to the internet.
   a. Desktop computer b. Laptop
   c. Smart device d. All of them
6. ....is a simulated 3-D environment that allows users to explore and interact with the surroundings, as if it were reality.
   a. CPU b. LAN c. VR d. GPR
7. .... uses open-source software.
   a. Android b. Apple iOS
   c. Both (A) and (B) d. Windows

امتحانات رقم (3)

Model Exam 1

1 Choose the correct answer:

1. On stock exchanges, stocks are called ....
   a. money b. shares c. e-commerce
2. .... is the on-demand storing and accessing of data and programs via remote servers on the internet.
   a. Data encryption b. Data breach c. Cloud computing
3. Augmented reality shows a .... model of what looks like the real world.
   a. 2-D b. 3-D c. invisible
4. All of the following are operating systems, except ....
   a. Android b. windows c. the CPU
5. The .... tag is used to create the largest heading in HTML.
   a. <h1> b. <h6> c. <L1>

2 Put (✓) or (✗):

1. Good digital citizens post others' ideas as their own. ( )
2. Programs that convert speech to text and vice versa are a type of assistive technology. ( )
3. Gmail is the email platform for Microsoft 365. ( )
4. User experience describes how people use and evaluate a product.( )
5. It is not necessary to report the threats to trusted people. ( )

3 Choose from column (A) what suits it in column (B):

Column (A)	Column (B)
1 Data encryption	a. connects the computer to the internet.
2 Screen readers	b. a network device that pass data to a specific device.
3 A switch	c. converts data into code to prevent unauthorized user access.
4 Spoofing	d. cyber criminals pretend to be a business or a known person to trick you.
5 A router	e. help blind people by converting text to audio.

1 .... 2 .... 3 .... 4 .... 5 ....

Model Exam 2

1 Choose the correct answer:

1. Passwords that contain at least 8 characters are ....
   a. useless b. less secure c. more secure
2. .... connect(s) users who are not on the LAN to access and manage data, files, and applications via the internet.
   a. Remote servers b. Switch c. Hub
3. If the product is practical and meets customer needs, the user experience will be ....
   a. positive b. negative c. neutral
4. You can use the shortcut .... to copy text or image in windows.
   a. "Ctrl + c" b. "Cmd + c" c. "Ctrl + x"
5. .... refers to works that have been granted permission to be shared by the creator.
   a. Creative Commons b. Public domain c. Copyright

2 Put (✓) or (✗):

1. Spoofing is the greatest cyber security threat. ( )
2. Microsoft Word is used to create presentations. ( )
3. The Disabled individuals can use virtual assistants powered by AI in their daily tasks. ( )
4. Anyone can read and modify the code in closed-source software. ( )
5. Electronic games can be fun, but they impact health. ( )

3 Complete the following using the words between the brackets:

(Microsoft 365 – User experience – Smartgloves – being depressed – sleep cycle)

1. .... empower deaf people to translate their signs in real time to spoken or text output.
2. Playing electronic games too much can affect your ....
3. .... is an example of cloud computing.
4. One of the psychological dangers of electronic games is ....
5. .... is how to use the product and interact with it.

Model Exam 3

1 Choose the correct answer:

1. If you've been hacked on your Instagram account, it is better to change ....
   a. Instagram password b. all accounts passwords
   c. none of them
2. .... is an open-source software for building robot applications.
   a. iOS b. ROS c. Android
3. .... confirms your identity by scanning your thumb.
   a. Fingerprint authentication b. Facial recognition c. A password
4. .... occurs when unauthorized parties gain access to confidential data and information
   a. Data breach b. Data theft c. Data encryption
5. A fake domain pretending to be a business is an example of ....
   a. malware b. spoofing c. virus

2 Put (✓) or (✗):

1. HTML tags have three main parts ( )
2. The EKB is an example of a general search engine. ( )
3. Computers can learn by analyzing the provided examples. ( )
4. OneDrive is complicated and difficult to use. ( )
5. Copyright only covers written material. ( )

3 Choose from column (A) what suits it in column (B):

Column (A)	Column (B)
1 Cloud storage	a. covers only one subject, such as business or law.
2 Creative Commons	b. protects printed and digital content.
3 Subject database	c. a person who handles the buying and selling of shares.
4 A broker	d. means creators give permission to share their works.
5 Copyright law	e. is often a fee-based service.

1 .... 2 .... 3 .... 4 .... 5 ....

Model Exam 4

1 Choose the correct answer:

1. .... runs a computer's software and hardware.
   a. Operating system   b. The CPU   c. Hardware
2. .... converts data into code to prevent unauthorized user access.
   a. Data breach   b. Data theft   c. Data encryption
3. .... combines the real world with a virtual world by adding images using computers.
   a. Augmented reality   b. Artificial intelligence   c. Virtual reality
4. A poem written in 1900 is ....
   a. copyrighted   b. not copyrighted   c. both a and b
5. Wired networks connect devices using ....
   a. Wi-Fi   b. radio waves   c. cables

2 Put (✓) or (✗):

1. It is important to balance between online and offline activities. (   )
2. Despite a small risk, cloud services are overall extremely safe and secure. (   )
3. If you are a victim of data theft, there is no need to report the theft. (   )
4. The Egyptian stock exchange allows citizens to invest in any market sector. (   )
5. Scareware tells you to click on the link to remove it, but the link is a virus. (   )

3 Complete the following using the words between the brackets:

(Robo-advisors – <h1> – Data breach – Scareware – eye strain)

1. .... occurs when unauthorized parties gain access to confidential data.
2. .... is used to create largest heading in HTML .
3. .... is a type of malware that pretends to be a virus alert.
4. .... are online applications that provide financial guidance and services.
5. Playing online games too often can cause ....

Model Exam 5

1 Choose the correct answer:

1 .... is a virtual 3-D environment that allows users to explore and interact with the surroundings, as if it were reality.
a. Virtual reality b. Artificial intelligence
c. Augmented Reality

2 .... scans your face using the device's camera to confirm your identity.
a. Fingerprint authentication b. Facial recognition c. Full disk

3 .... is an open-source operating system for mobile devices.
a. Android b. iOS c. macOS

4 .... is the Microsoft 365 storage application.
a. Google Drive b. OneDrive c. Outlook

5 If you are exposed to cyber security threat, you should .... it.
a. ignore b. accept c. report

6 To make the text bold in HTML, you can use the .... tag.
a. <i> b. <s> c. <strong>

7 .... is a market where buyers and sellers deal in units of company stocks.
a. Online shopping b. Stock exchange c. Supermarket

2 Put (✓) or (✗):

1 Cloud storage services are always free. ( )
2 Routers work as gateways that connect your device to ISP. ( )
3 It is responsible to leave your devices at risk without protection. ( )
4 Electronic games can make some people anxious and depressed. ( )
5 Copyright includes only books, music, and videos. ( )
6 In HTML, the <i> tag is used to display text in italics. ( )
7 Linux is the most popular operating system all over the world. ( )
8 Switches are used to connect computers to the ISP. ( )

Model Exam 6

1 Choose the correct answer:

1 .... is the greatest cyber security threat.
a. Malware b. Anti-virus c. Firewall

2 Sharing your friend's photos without their permission is .... behavior.
a. responsible b. irresponsible c. safe

3 To upload a file or folder on OneDrive, you should first .... Microsoft office.
a. download b. sign in c. share

4 The following HTML tags are correct, except ....
a. <a> .... b. <i> .... </i> c. </p> .... <p>

5 .... a virtual 3D environment for users to explore and interact as if it were reality.
a. Virtual reality b. Artificial intelligence c. Assistive technology

2 Put (✓) or (✗):

1 Egypt established the Data Protection Law to protect its citizens. ( )
2 The ability of the computer to think and learn is called AR. ( )
3 Examples of cloud computing include Google Drive, OneDrive, and Google Chrome. ( )
4 E-trading allows more independence for investors. ( )
5 There is no difference between augmented reality and virtual reality. ( )

3 Complete the following using the words between the brackets:

(MFA - Stock exchange - aggressive – Remote servers – Wired networks)

1 .... connect devices using physical cables.
2 Some electronic games promote violence and can make some people ....
3 .... requires at least two ways of identifying yourself.
4 .... connect users who are not on LAN to access and manage data, files, and applications via the internet.
5 .... is a market where buyers and sellers deal in units of company stocks.

Model Exam 7

Choose the correct answer:

1 .... are group of people or things that are connected to each other.
a. Servers b. Networks c. Hubs

2 .... is computer apps that perform complex tasks that simulate the thinking and performance of the human element.
a. Artificial intelligence b. Augmented reality c. Remote sensors

3 The latest version of service or product is called .... technology.
a. assistive b. cutting-edge c. virtual

4 .... is a closed-source operating system for mobile devices.
a. Android b. Apple iOS c. Windows

5 VR headset blocks out the .... world(s) and provides views that immerse the user in another world.
a. real b. virtual c. both of them

6 .... is a cloud storage provided by Microsoft for accessing files anywhere.
a. Collections b. Favorites bar c. OneDrive

7 The email platform of Microsoft 365 is ....
a. Gmail b. Outlook c. Yahoo

8 .... empower deaf people to translate their signs to spoken or text output.
a. Hearing aids b. Screen reader c. Smartgloves

9 Large gaming communities are filled with ....
a. cyberbullies b. doctors c. both a and b

10 To create the smallest heading in HTML, use the .... tag.
a. <h1> b. <h6> c. <S1>

11 .... software means that it can't be seen or changed by the public.
a. Open-source b. Closed-source c. Both of them

12 Egypt considers works in the public domain after .... of the creator's death.
a. 5 years b. 50 months c. 50 years.

13 EKB is an example of .... database.
a. subject b. general c. Electronic

14 Complicated and hard-to-use products result in .... user experiences.
a. positive b. negative c. neutral

15 Visually impaired people can use .... to see their family members up close.
a. augmented Reality b. artificial intelligence c. hearing aids

Model Exam 8

1 Choose the correct answer:

1. Word prediction on smartphones is an example of ....
   a. artificial intelligence b. augmented reality c. virtual reality
2. .... is a Microsoft application that can help you share works with your friends.
   a. Word b. PowerPoint c. OneDrive
3. To use images, videos, or infographics of someone, you should ....
   a. ignore the owner b. share them without permission
   c. ask for permission
4. .... is a device that connects a local area network (LAN) to the internet.
   a. Artificial intelligence b. A modem c. A server
5. E-trading has made the process of buying and selling shares more ....
   a. difficult b. expensive c. efficient

2 Put (✓) or (✗):

1. You should use weak passwords to protect your data ( )
2. E-trading platforms are now common places. ( )
3. HTML elements break up web pages so, it is difficult to read. ( )
4. Virtual reality is a virtual 2-D environment that allows users to explore and interact with the surroundings. ( )
5. macOS runs on on most computers worldwide. ( )

3 Choose from column (A) what suits it in column (B):

Column (A)	Column (B)
1 MFA	a. it is used to make text bold in HTML.
2 <strong>	b. stands for Hyper Text Markup Language.
3 VR headset	c. requires at least two ways of identifying yourself.
4 HTML	d. is an operating system for Apple computers.
5 macOS	e. is used to experience virtual reality.

1 .... 2 .... 3 .... 4 .... 5 ....

Model Exam 9

1 Choose the correct answer:

1. .... runs a computer software and hardware.
   a. Windows explorer b. Operating system c. CPU
2. .... converts the digital text into audio to help blind people.
   a. Brille terminal b. Screen reader c. Screen magnifier
3. To make the images accessible on web pages, add .... to <img> in HTML.
   a. alt-text b. meta c. title
4. .... scrambles your data and requires a password to access it.
   a. Full disk encryption b. Facial recognition c. Both a and b
5. .... can imitate sounds when provided with the tone of voice of an actual human being.
   a. Augmented reality b. Artificial intelligence c. Switches

2 Put (✓) or (✗):

1. You should play a lot of electronic games to fall asleep right away. (   )
2. OneDrive is a Google Workspace storage application. (   )
3. The internet helps electronic trading platforms to be common places. (   )
4. You can access files stored in the cloud even without an internet connection. (   )
5. Strong passwords contain letters, numbers, and special characters. (   )

3 Complete the following using the words between the brackets:

(ROS – Facial recognition – E-trading – MFA – Programming languages)

1. .... made the process of buying and selling shares more efficient.
2. .... is an open source operating system that is used for building robot applications.
3. .... are instructions to a computer are given in code.
4. .... scans your face using your device's camera to confirm your identity.
5. .... stands for Multi-factor Authentication.

Model Exam 10

1 Choose the correct answer:

1. .... are collections of information stored in a computer system.
   a. Search results b. Databases c. Software
2. .... can take you to a museum thousands of miles away.
   a. AR b. VR c. AI
3. The HTML tag that is used to create a paragraph is ....
   a. <h> b. <a> c. <p>
4. .... networks connect devices using Wi-Fi.
   a. Wired b. Wireless c. Both of them
5. .... are operating systems run on cell phones.
   a. Windows b. Android c. Apple iOS

2 Put (✓) or (✗):

1. Creative commons means the creator has been deceased for at least 50 years. ( )
2. Copy, paste, and cut are used for processing videos. ( )
3. Virtual reality allows you to explore world museums from home. ( )
4. Artificial intelligence (AI), augmented reality (AR), and virtual reality (VR) are examples of cutting-edge technology. ( )
5. General databases provide information on a specific topic. ( )

3 Complete the following using the words between the brackets:

(Smartgloves - Wireless network - Assistive technology - <a> - modem)

1. .... helps people of determination in their daily works
2. .... is a tag that is used to create a hyperlink in HTML.
3. .... connect devices without wiring by using Wi-Fi.
4. .... translate sign language to spoken or text output.
5. A .... converts the signal from ISP into a digital signal.
